**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***PROSECUTION REOPENED:***

Prosecution is reopened based on the following rejections.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, Applicant specification does not support the range of "greater than 100 sccm" for the hydrogen precursor. Applicant's specification does exemplify the range of "50-500 sccm" for the hydrogen precursor. However values greater than 500 sccm are not supported. Furthermore the criticality of the endpoint of greater than 100 sccm is not shown or demonstrated. Applicant has previously stated that support for the flow rates comes from page 26 lines 1-8.

### ***Response to Arguments***

Applicant's arguments filed November 24, 2008 have been fully considered. The Examiner has withdrawn the rejections based on Applicant's arguments. However the Examiner raises a new 35 U.S.C. 112 1st paragraph rejection with respect to the claims. More specifically support for the range "greater than 100 sccm" for the hydrogen

precursor has been raised as discussed above. It should be noted that Applicant's specification does exemplifies the range of "50-500 sccm" for the hydrogen precursor. However values greater than 500 sccm are not supported. Furthermore the criticality of the endpoint of great than 100 sccm is not shown or demonstrated. Applicant has previously stated that support for the flow rates comes from page 26 lines 1-8. It should be noted that previous to adding the range limitation of "greater than 100 sccm" the claims were rejected over Papasouliotis et al. '745 and '290.

This action will be made NON-Final based on the new rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M-Th with every Friday off..
